

# AUORA

## ENTREPRENEURIALIS

STEAM and Toolcamp seminar 25.4.2024

# Group task

Think about your own work  
Have a discussion with your group:

*Where and how could I use the process model in my work?*

Write your answers to your group's slide

# Group 1

We can use STEAM for teaching entrepreneurship.

Teaching different subjects in projects.

Question is do we use this method all the time.

STEAM is good for teaching arts.

STEAM can help students when they are using english and english is not their native language.

Students likes learning in different methods (not just sitting in the classroom - more learning by doing)

# Group 2

**STEAM**  
IN OULU

## Tips for the STEAM process

- Notice the participants' uniqueness and abilities
- Uncertainty in the process is expected and should be tolerated
- Progress is made at the learners' own pace
- STEAM brings freedom – make use of it
- Make things tangible to the learners

We think this model is quite alike working with projects such as JA, which is learnt in the course Entrepreneurship with or without other joint courses.

However, the problem is to work together with other courses such as swedish, english, maths...

The positive parts of this model is that it is very clear which makes it easy to work with.

It's a very established model which is used in various places.

It would be great if it were implemented in elementary school as well...
